

OS not supported by Flex

Note the error in bold in the following `debug.log` file.

```
-----  
11:06:38 (lmgrd) Starting vendor daemons ...  
11:06:38 (lmgrd) License server manager (lmgrd) startup failed:  
11:06:38 (lmgrd) CreateProcess error code: 0xc1 File= awrd.exe  
-----
```

This error indicates that the license server is attempting to start on an unsupported OS. A common instance where you might see this error is when using the Flex V11.12 tools on Windows Server 2003 or Windows XP. To solve this problem you can either install the server on a supported OS.
