

# Counts the Number of Elements in an ACE Netlist

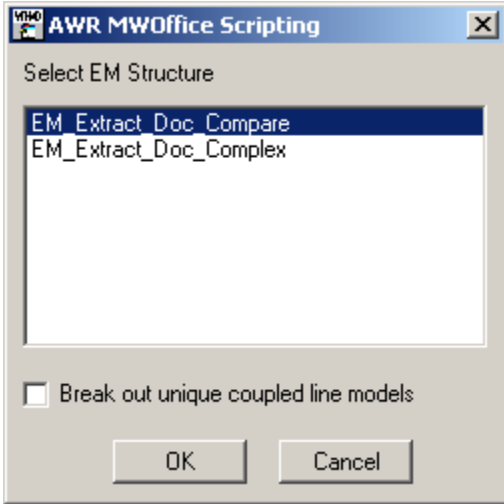

## To run this script

Select **Scripts > EM > ACE\_Component\_Count** from the Menus.

Or, in versions that support the script, you can run the utility directly from this page using this button.

## Description

This utility counts the number of elements in an ACE netlist. It will ask the user to select an EM structure first:

If you check the "Break out unique couple line models", it will break out models so you will get more details about coupled line models instead of being generic.

Then it will open a Design Notes window specifying the details:
