

Remove Space from GDS Filenames

To run this script

Select **Scripts > Layout > Remove_Spaces_from_GDS_Filenames** from the Menus.

Or, in versions that support the script, you can run the utility directly from this page using this button.

Description

This script will remove the spaces in GDSII libraries. Some processes on computers are not tolerant of spaces in filenames, such as exporting layouts, etc. This script will automate removing any spaces in schematic names. It will output which libraries and cells it changed in the Visual Basic debug window.

```
Renamed GDSII Library to GDSII_Library  
Renamed GDSII_Library>New Cell to New_Cell
```
