

Change Local Host Port Number for Browser

To run this script

Select **Scripts > Configuration > Change_Port_Number** from the Menus.

Or, in versions that support the script, you can run the utility directly from this page using this button.

Description

This script was developed to help customers change the local host port number in their browser to run AWRDE interactive content. When you run this script, you will see the dialog below. Enter new port number to use for the browser. If a port number is already being used it'll be displayed in the dialog box otherwise it'll be blank. Enter a desired port number and click **OK**.
