

Email Global Scripts

To run this script

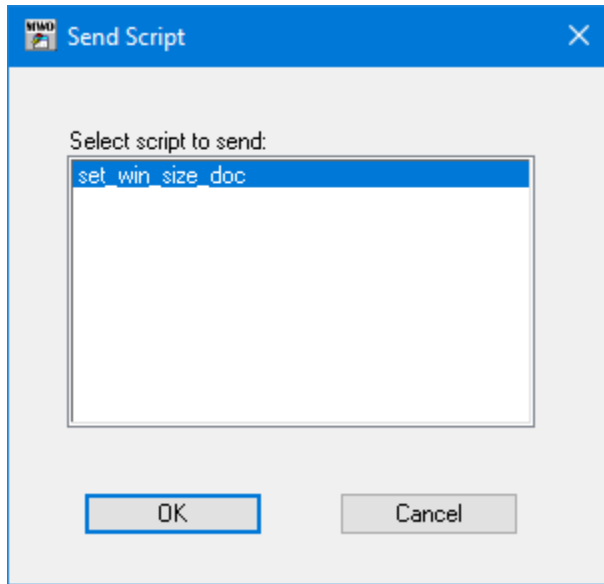

Select **Scripts >Configuration > Send_Script** from the Menus.

Or, in versions that support the script, you can run the utility directly from this page using this button.

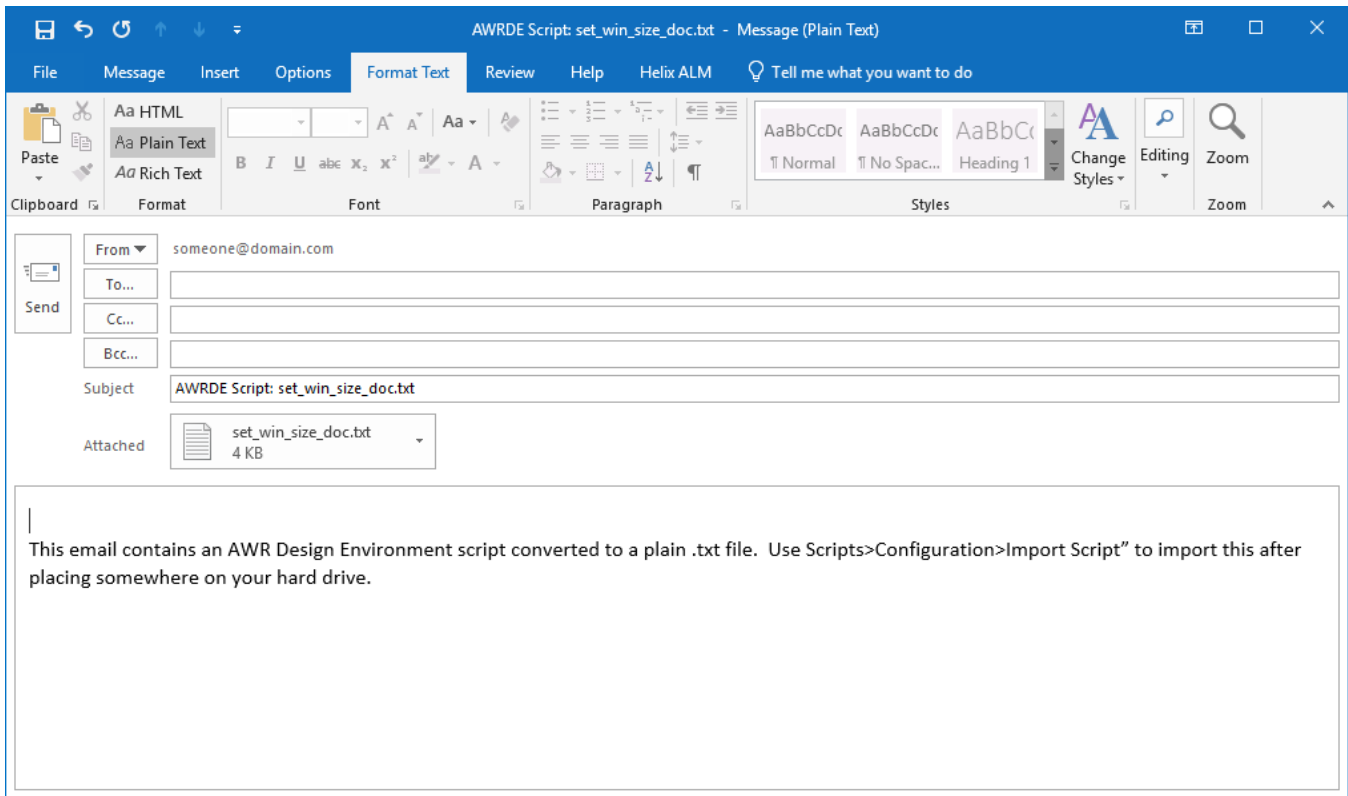

Description

This script automatically attaches a global script to an email, changing the extension from .bas to .txt so it is email-friendly.

Dialog Box for selecting the script to be emailed

Dialog Box For selecting script to send.

Email generated by script.
