

To perform a Search operation

1. Verify that the date, time, and time zone on the system are correct.
2. See [To correct your Windows system clock](#).
3. Reboot the computer. If the problem persists, move to the next step.
4. Verify that there are no hidden files and folders.

Windows 10:

- Right-click on the Windows Start button
- Choose Control Panel and open the File Folder Options.
- On the View tab, verify that:
 - Show hidden files and folders is selected.
 - Hide file extensions for known file types is cleared.
 - Hide protected operating system files (Recommended) is cleared.
- Click Yes when prompted.
- Click Apply and OK.

Now Search the computer hard drive for files with future file dates.

Windows 10:

- Open Windows Explorer
- In the search bar type today's date and a date far in the future.
 - An example is "datemodified:11/10/2016 .. 11/10/2098"
- The search will begin automatically.
