

# Label Time, Date and Project Name to Graphs and Schematics

## To run this script

Select **Scripts >Project > Label\_Time\_Date\_Project\_Name** from the Menus.

Or, in versions that support the script, you can run the utility directly from this page using this button.

## Description

This script will add project title, time and/or date to the graphs or schematics. When you run this script, all schematics and graphs are searched for the text "Project:", "Time:", and "Date:". Note, the case and the semicolon are required. The script will update this text with the current project name, time and/or date. You can use any size font you want.

Below is a picture of an example graph after you run the script:
