

Easily Edit Graph Titles

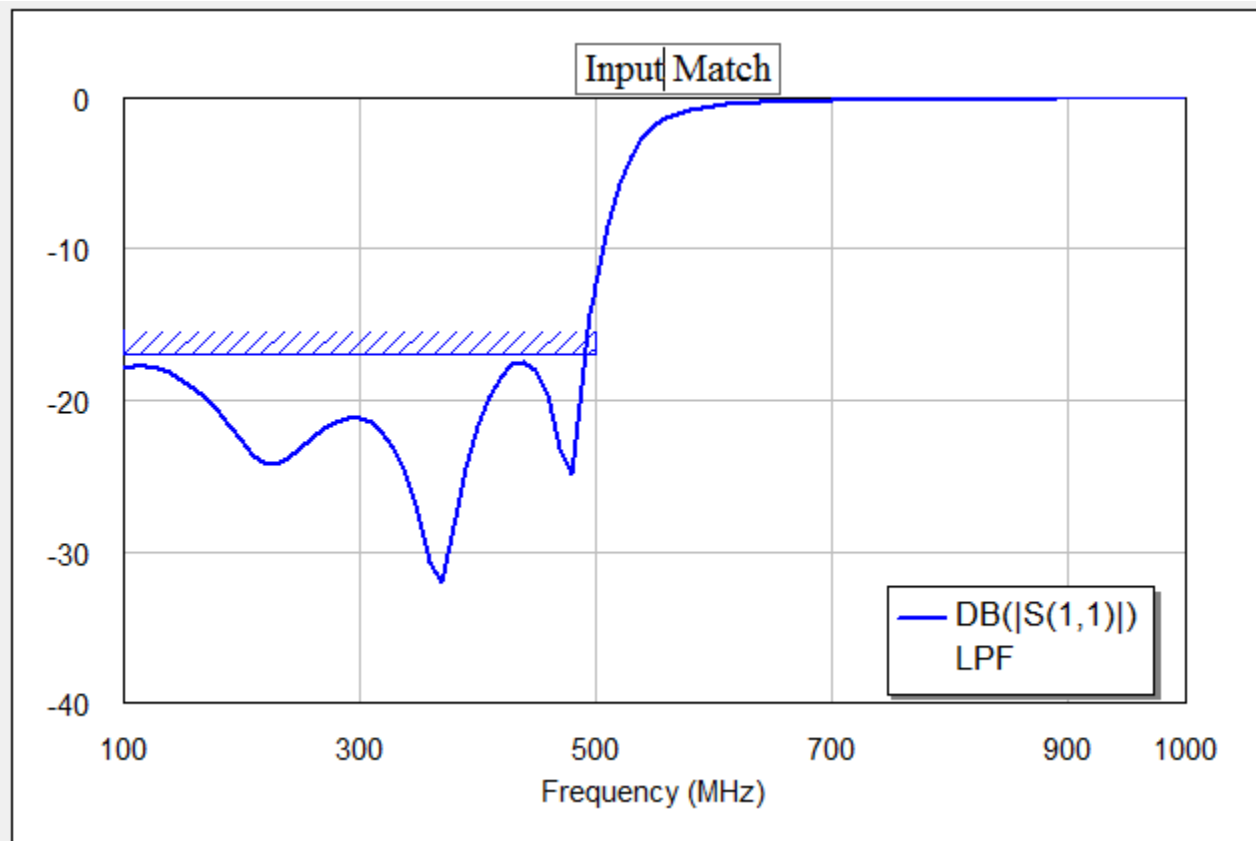

Starting in V14, you can double-click on a graph title to edit the name directly on the graph.

For example, see the rectangular graph below.

Double-click directly over the graph title, **Input Match** in this case.

A text edit box will display around the graph title and the cursor will be inserted where you clicked.

When you are done editing, type **Enter** or click outside the title area to complete the title edit operation.
