

# AWR Scripting in Python: Miscellaneous

Example Python code snippets

here

## Running VBA Installed Script from Python

Use the GlobalScripts method

GlobalScripts('<installed script name>').Routines('<subroutine name>')

This example launches the Import Load Pull Files script

```
import pyawr.mwoffice as mwo                #Import pyawr interface to AWRDE
awrde = mwo.CMWOoffice()                   #Establish link to AWRDE
awrde.GlobalScripts('Import_Load_Pull_Files').Routines('Import_Load_Pull_Files').Run()
```
