

Property Grid, Variable Browser, and Drawing Layer pane of Layout Manager

Functionalities such as searching, sorting, filtering etc. work the same way in property grid, variable browser, and layout manager.

- **Property Grid:** is an efficient way of navigating and editing a list of properties, and is used for various purposes in the AWR Design Environment. The following video demonstrates the features common to most property grids.
Your browser does not support HTML5 video.
- **Variable Browser:** shows users how to effectively use the variable browser to manage their design variables. Your browser does not support HTML5 video.
- **Drawing Layer Pane:** of the Layout Manager has similar functionalities. Your browser does not support HTML5 video.
